

Our work in geography will locate countries and continents of the world when reviewing where our food comes from. We will be considering how the daily and seasonal weather patterns affect the types of food that is grown and produced.

In Art and DT we are using 3D models and levers to represent parts of the body to support our learning in science.

In PE, we will continue to work on hand and eye co-ordination and teamwork in games. Also we will practice skills and build stamina in a range of athletics. We learn about water safety and swimming skills throughout this summer term.

Musically, we will be learning songs about the body. We will be reviewing and combining sounds to design exercise routines.

Year 2 'Super Me'topic Summer 2 WOW is to create a human body with sculptures made as voluntary homework.

Enrichment includes Freddy Fit to prompt our design of a Healthy Self! This will be part of a 'Healthy Self' day in June to promote caring for our bodies.

Numeracy hot spots:

- Selecting the maths to use to solve a variety of topic and real life problems
- Using addition/subtraction and multiplication/division as inverse.
- Measuring time, length and height.
- To collect and analyse data as part of our topic

Literacy learning:

- Asking questions to extend understanding and knowledge.
- Using spoken and written language to think about real events and personal experiences.
- Identifying and clarifying new words that link with the human body.

Our value is Compassion and our project is to create fruit baskets to sell to raise money for charity showing we care about others.

Voluntary topic homework is to design and make a full scale part of the human body. This can be bones, muscles, teeth, organs. We will make this in a WOW session during the first week of July.

In science we will be recognising and comparing the main external parts of the bodies of humans and other animals.

We will be learning about taking exercise (linking to Numeracy) and that eating the right types and amounts of food help humans to keep healthy.

Within all of our learning, we will be finding out why humans need food, water and air to survive.

We are using technology to find out about parts of the body using animations, simulations and research reading.

We will revisit eSafety as an important part of keeping safe.

In RE we will be looking at the values and commitments of the Jewish religion and how they link to our own views and beliefs. We will explore commitment through social, cultural and spiritual behaviours of human beings, and how these impact on the quality of life and wellbeing.
